Administration Manual

Benedikt Þórðarson, Jóhann Berentsson, Snorri Birgisson

November 2014

Installation and running the program:

To run the program. The machine needs to have Java Runtime environment as well as Gradle installed.

1. Clone the github repo: https://github.com/Snorrib12/Sidannannarverkefni

2. Build the program with Gradle.
   Run "gradle MakeJar"in the program folder through shell.

3. Run the jar you just built. "java -jar build/libs/TicTacToe-0.1.jar". The jar file is located in the libs directory inside the build directory you created in the last step.
